

FURTHER ACTIVITIES

- Read the following summary of the text “The Chocolate House”.
- Cross out all the factual errors and provide the correct information.
- In pairs, check mistakes and correction.

SUMMARY

The chocolate house was built by the French architect Jean-Luc Decluzeau and his son. It's made of 1.5 tonnes of chocolate coated sheets of wood. Everything from its walls and roof to the fireplace, bookcase and duck pond is crafted from cocoa. It was built in winter with a temperature of minus 5 Celsius to prevent it from melting. You can visit it at the Musée de Sevres, just outside Paris in France. A maximum number of four guests can book an overnight all around the year, but prices are extremely high, only few people can afford it. Guests can eat ornaments and furnishing, but they must pay extra charge.

SUMMARY CORRECTION

The chocolate house was built by ~~the French architect~~ **artisan chocolatier** Jean-Luc Decluzeau and his son. It's made of 1.5 tonnes of ~~chocolate-coated sheets of wood~~ **chocolate**. Everything from its walls and roof to the fireplace, bookcase and duck pond is crafted from cocoa. ~~It was built in winter with a temperature of minus 5 Celsius~~ **The chocolate-maker had to work with the air conditioning on** to prevent it from melting. You can visit it at the Musée de Sevres, just outside Paris in France. A maximum number of four guests can book an overnight stay ~~all around the year~~ **only on 26 September 2018 and 6 October 2018**, ~~but prices are extremely high, only few people can afford it.~~ **at the bargain price of €50 per night**. Guests can eat ornaments and furnishing, ~~but they must pay extra charge~~ **which will be replaced**.
